

Release Notes

1.1.4

New Features / Improvements / Bug Fixes

- Air and Doppler plug-ins are now separate products

1.1.3

New Features / Improvements / Bug Fixes

- Changes were only made on the Doppler plug-in

1.1.2

New Features

- Commas can now be used to define decimal points
- The Trial runtime is now 30 days instead of 7 days.

Improvements

- Installers have new graphics

Bug Fixes

- Fixed the formula of Distance Attenuation that was causing double the attenuation
- Fixed a bug where changing units would cause the audio output to have a stutter effect
- Fixed a bug where the Audio Units V3 files would only have 3 KB of size
